

# BCP401/601 Beer Cooler Pod

The **Beer Cooling Pods** are designed to be mounted under the bar, to provide extra cold product to either a four or six taps at the point of dispense. Manufactured to very high specifications, the best in the market. The BCP outperforms all other similar products in its class.

The all stainless steel construction provides high performance and superior delta T when compared with similar devices. High cooling transfer rates ensures highly repeatable drink temperatures whether from a half-pint or open tap applications.

- The pressure vessel is manufactured from 304 stainless steel; the product coils and associated welded fittings are 316 stainless steel.
- All seams are Tungsten Inert Gas (TIG) welded.
- Insulation is closed cell, low-density polyurethane rigid foam with a minimum thickness of 25mm.
- The protective outer cladding is plastic coated mild steel.
- Complete with integral carrying handles.
- Can be mounted in three orientations for maximum flexibility of installation.

Part Number	No of Products	Dimensions Height X Width X Depth	Dry Weight
BCP401	4 x 11mtr	540mm X 380mm X 155mm	15 KGs
BCP601	6 x 11mtr	540mm X 380mm X 185mm	17.5 KGs
